BIG APPROPRIATION BILL IN HOPPER

STATE WILL GET SIXTY-FIVE MILLION DOLLARS FOR NEEDS

Orient Farm to Get \$450,000 for Cottages to Care for 600 Patients—Ohio State University Receives \$7,500,000 a cut of \$8,400,000 From Its Original Request.

Representative Perry L. Green, chairman of the finance committee, has introduced the bill appropriating \$65,000,000 for the next two years.

Ohio State university will get approximately \$7,500,000. This represents a cut of about \$400,000 from the budget commission's figures and is \$8,400,000 less than the amount originally requested by the university.

Under provisions of the bill, Columbus State hospital will receive \$171,000 of which \$100,000 is for a psychopathic hospital for the Bureau of Juvenile Research.

While the London Prison Farm is to get \$350,000 for its building program, no large contribution is made for improvements at the old penitentiary on Spring street.

Ohio should be able to take care of 1200 additional feeble-minded patients in state institutions during the next two years under provisions of the bill. Representative Perry L. Green, of Portage county, chairman of the house finance committee, said.

The bill carries \$700,000 for the care of feeble-minded in connection with Longview hospital for the Insane at Cincinnati. This is in lieu of funds for a new feeble minded institution in that part of the state.

If the Grafton farm is found to have sufficient water on it, an institution will be erected there. If not, \$200,000 will go for land purchase elsewhere and the building will cost around \$800,000.

For development of the farm for feeble-minded at Orient \$450,000 is set aside. This brings the total for immediate relief for the feeble-minded to approximately \$2,200,000.

In the contemplated expansion at Orient farm are three cottages to cost about \$450,000 which will care for 600 additional patients. There is also \$68,000 for improvements.

A fund for allowing the maximum pay for guards in penal institutions to be raised from \$100 to \$120 a month is set aside. Blanket increases

of \$10 a month for attendants in state institutions are also allowed.

Ohio and Miami universities and Kent and Bowling Green Normal schools get about \$500,000 each for new buildings. Wilberforce gets \$170,000 for betterments and \$161,200 a year for maintenance.

The highway department will get \$8,400,000 for road construction of which \$1,400,000 is for construction of the secondary roads. This department originally asked for \$20,000,000. This was cut to \$9,555,000 by the budget commissioner before it got to the legislature.

The prohibition department will get under the proposed bill, \$72,000 a year. For salaries of agents this department was given an increase of \$35,000 a year at the personal request of the governor. This will permit hiring of more regular inspectors.

The state's income for the two years is estimated at \$65,000,000 and this bill and other supplemental bills to come later will call for expenditures of \$65,320,000. These balances, so far, are indefinite because of the uncertainty of the automobile revenue.

SIGNORA RIANO

Signora Riano, wife of the Spanish ambassador to the United States, a Washington girl, who became doyenne of the diplomatic colony when her husband became dean of the diplomatic corps following the retirement of Ambassador Jusserand of France.

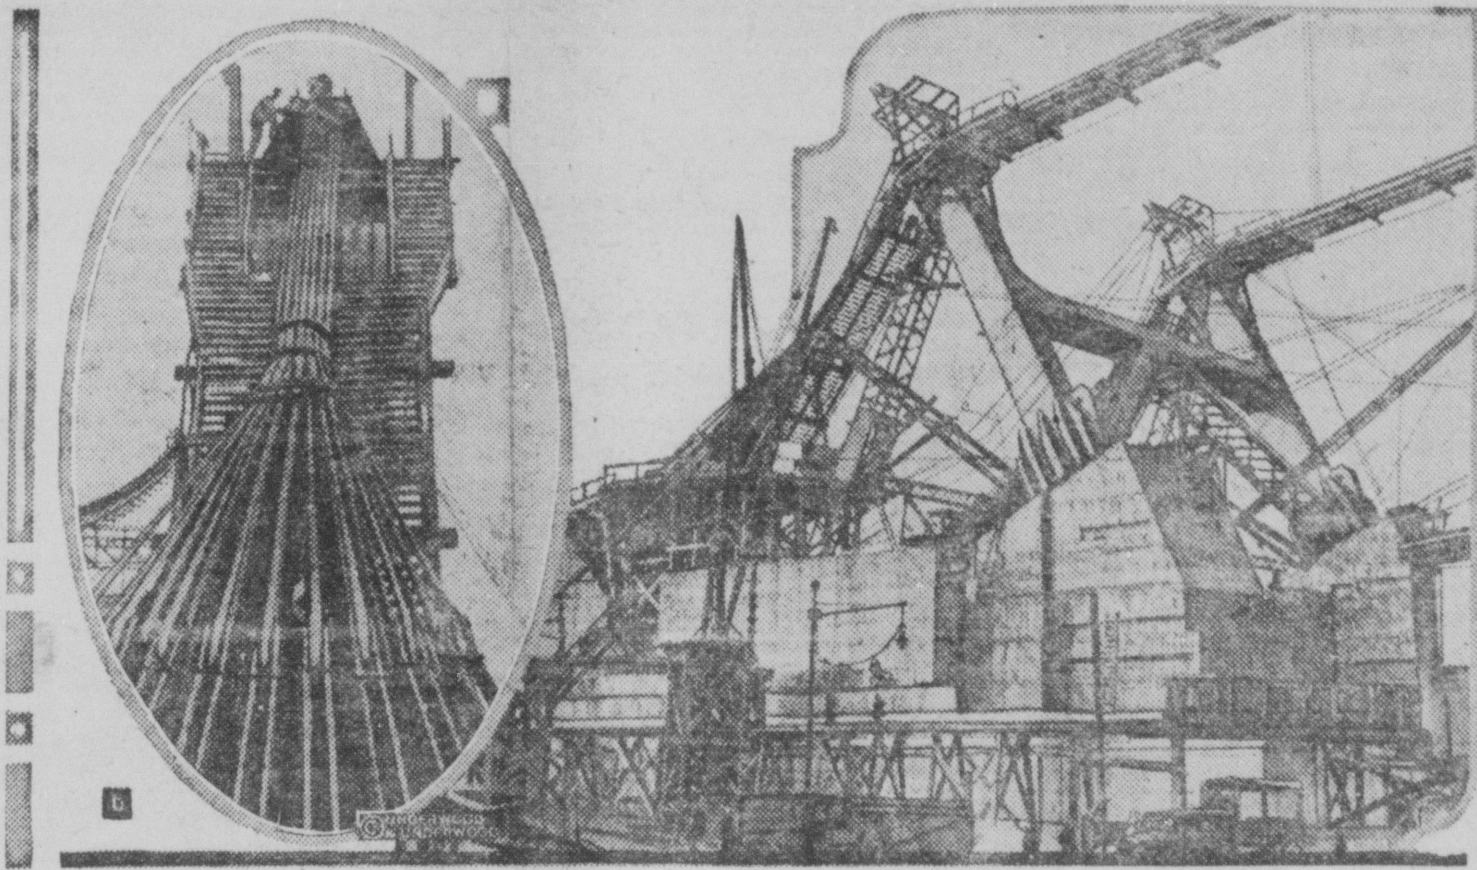

OHIO WOMAN IS KILLED; FOUR HURT IN CROSSING CRASH

Fort Wayne, Ind., March 1.—Mrs. Cora Warner, 30, of Scott, O., was killed and four others injured, two of them seriously, when an automobile in which they were riding was struck by a Wabash Railway train at a crossing here early today.

The injured are: Miss Thelma Warner, 13, daughter of Mrs. Warner, may die; Francis Warner, 17, Mrs. Carl Glass, 23, Scott, probably skull fractured and may die, and Carl Glass, 23.

MRS. SUSAN GARNES DEAD. Mrs. Susan Garnes, colored, a widow, died at her home, 332 East Ohio street this morning at 8 o'clock following a five days illness of pneumonia. She is survived by one son, Ernest Garnes who resides at Atlanta, Georgia.

RIPE OLD AGE

Jacob Shultz Died at Home of His Daughter, Monday.

Jacob Shultz died at the home of his daughter, Mrs. Nellie Bowsher, 156 West Water street Monday evening, March 2, at 5:30 o'clock. The deceased had been ill three weeks. His death was due to senility.

Mr. Shultz was born in Pennsylvania, November 5, 1840. He was the son of James and Lydia Pennel Shultz. He married Miss Jennie Coon who died some years ago. The deceased was a farmer by occupation. He had been a resident of this county for sixty years.

Mr. Shultz is survived by five daughters; Mrs. Nellie Bowsher, of this city; Mrs. Kathleen Thompson, of Houston, Texas; Miss Madge Funk, of Columbus; Mrs. Bernice Winstiger of St. Petersburg, Florida, and Mrs. Maude Wanzel of West Jefferson, Ohio.

Of his immediate family, a half brother, Abraham Barnatti, of Columbus, is living.

UNITED STATES CUSTOM OFFICERS ASKED TO RESIGN.

Detroit, Mich., Feb. 28.—(U. P.)—Four United States custom officers are without jobs today following an investigation late Friday by Revenue Collectors Carey D. Ferguson on charges made by Crown Attorney Geo. A. Urquhart, of Windsor, Ont., that bootleggers were bribing custom officials to permit liquor to cross the border safely.

The crown attorney made his charges yesterday when Terrill Winstead of Detroit, appeared in Windsor to claim \$3,000 worth of liquor seized by the provincial police. The liquor was secreted in an automobile.

Collector Ferguson called four officers regularly stationed to watch the ferries unloading from the Canadian city and after questioning them asked their resignations which were given.

ENGINEERS HERE.

Thirteen men employed in the engineering department of the Chesapeake and Ohio railroad company, have secured reservations at the Boggs hotel and will remain here until the road is built thru this county.

SHERIFF RUNS DOWN FOUR RUM RUNNERS

On the Wings of the Morning Men Knabbed With Eight Gallons of Liquor.

Charles B. McKenzie, George Medbury, of Columbus, Ben Fout, of Grove City and James Smallwood, of this city, were placed under arrest this morning about five o'clock by Sheriff Young and Deputy Howard Irwin.

The arrest at such an unseemly hour was spectacular. On a tip given the sheriff from Columbus, to be on the lookout for the rum runners at 4 o'clock this morning, the sheriff, accompanied by his deputy got his Buick car out quickly, and trailed the suspects, as they came into town. They were chased down South Scioto street. Their car was stopped in front of Al Dodd's grocery where one of the bunch alighted and entered. He came out in a few minutes, jumped in the car and directed the man at the wheel to drive south. The sheriff shot his car directly across the path of the rum runner's car and it came to a standstill. The occupants of the car were placed under arrest. The car was searched and eight gallons of liquor was found.

The prisoners were arraigned before Judge Adkins, McKenzie on the charge of transporting intoxicating liquor and possession of same. The others prisoners George Medbury, Ben Fout and James Smallwood, were charged with possession of intoxicating liquor.

McKenzie was released on bond of \$1,000 on transporting and \$500 on possession, and the three others were released on a \$300 bond. Their hearing is set for next Tuesday morning before Judge Adkins.

Marriage Licenses.

Charles F. Martin, 47 farmer, Washington township, and Bertha Calvert, 47, Circleville. Rev. O. L. Ferguson.

AT M. E. CHURCH.

Rev. W. C. L. Correll will lead the devotional services at the Methodist church Wednesday evening.

ZERO WEATHER.

The thermometer at the government weather station registered one above zero this morning.

PEN CONVICT BATTERS WAY TO LIBERTY.

Columbus, O. March 3 (U. P.)—Using a heavy motor truck as a battering ram Burton Carter, convict, crashed the big iron gate of Ohio penitentiary today for a scant few minutes of freedom.

C. F. Bittac, a carpenter, who was passing the prison at the time, heard the cries of Deputy Warden Woodward, gave chase and captured Carter single handed. Carter had left the truck, virtually wrecked and was fleeing west on Spring street when the carpenter overtook him.

EDUARDO RACEDO

Eduardo Racado has been appointed first secretary of the Argentine embassy at Washington. Mr. Racado first was assigned to Washington as an attaché in 1910. From there he was sent to the Argentine embassy in Brazil. He returns to Washington with a bride, the marriage having taken place last December in Buenos Aires.

The scientists are now worrying their heads off about how to control sex before birth, as if it weren't hard enough to control it afterwards.—Ohio State Journal. Some sexes, we have noticed, are harder to control than others.—Newark Advocate.

DIXIE MILLS, CRITES MILLS PURCHASED

Former Sold to John G. Arnold, of Greenville; the Latter to H. M. Crites.

The Dixie Mills properties formerly known as the Hefner Mills and the Crites mills were sold Monday afternoon by the receivers of the Dixie mills, Charles Gerhardt, of this city and Edwin C. Wright of Greenville. The sales were made thru their attorneys, I. F. Snyder of this city, and Marion Murphy, of Greenville. W. E. North was the auctioneer.

The Hefner mills later known as the Dixie mills, located on the corner of Clinton and Mill streets, appraised at \$37,500, was purchased by John G. Arnold of near Greenville for \$25,050. The Crites mill and elevator located at the corner of Court and Huston streets, appraised at \$75,000 was purchased by H. M. Crites for \$50,000. These bids were two-thirds of the appraised value of the properties sold.

HAPPENINGS IN OUR STATE

Taken Direct From the Wires by Correspondents of the United States Press Association.

(United Press.)

Youngstown, March 3—An unidentified man was found frozen to death as the mercury dropped to three above zero here today.

Marysville, March 3—While dressing for school Miss Helen Ewing swallowed a bar pin an inch long. It has not been removed. Miss Ewing is a star on the high school basketball team.

Columbus, March 3—William D. Fulton, 61, a native of Licking county and at one time secretary of state of Ohio, died at Mt. Clemens Michigan yesterday following a heart attack.

Cleveland, March 3 Mary Ondrejko's father has been summoned to appear before the police prosecutor and explain why he spanked his 22 year old daughter for curling her hair.

Hamilton, March 3—Stabbed 42 times, shot and slugged by bandits because his pockets contained only \$1.12 Paul Connaughton, 30, will live, physicians said today.

Cincinnati, March 3—Roy A. Wetherall 23, heir to a quarter million dollar Kentucky estate, was found guilty of stealing \$2. Sentence was suspended pending the outcome of his trial on charges of banditry and robbery.

Cincinnati, March 3—The engineer, firemen and several passengers were killed when a Cincinnati train was wrecked today at Flatrock, Kentucky, according to first reports from the scene of the accident.

HILL FARM SOLD.

The R. C. Hill farm of 73 acres in Muhlenberg township was sold at public sale by the owner at the court house Saturday to Harry Trump at \$131 an acre. C. G. Chalfin was the auctioneer.

JANUARY SALES OF FORD CARS AND TRUCKS.

January sales of Ford cars and trucks totaled 103,022, according to figures given out at the office of the Ford Motor company. In addition, the company sold 4,156 Fordson tractors and 395 Lincoln cars during the first month of the year.

Of these, domestic retail deliveries for January were 76,062 Ford cars, 13,790 trucks, 3384 Fordsons and 371 Lincoln cars. Foreign sales figures in the totals do not include those of Canada or British possessions which are served by the Ford Motor company of Canada, Ltd.

Sales reports for the first part of February show an increasing demand generally and in order to care for growing requirements all Ford manufacturing plants are now operating on a full six day a week schedule. This includes the big Highland Park and River Rouge plants and all the smaller producing units.

SAVED MONEY AND WEAR ON TROUSERS

An Indiana pedagogue, who, since the events narrated in this story, has attained some prominence in state educational circles, decided to buy a new suit soon after arriving at the college town for his first semester in college. He liked one suit very much, it just seemed made for him, but he viewed the pronounced crease in the trouser legs with trepidation and finally stammered:

"Well, I like the suit but I don't like that wrinkle."

He later came to accept the "wrinkle," however, in fact, he became such a slave to it that he worked overtime to keep it. One night two college chums went to his room and found him, trouserless, studying. To their inquiry as to the cause of his state he replied:

"Oh, it costs me so much to keep the crease in I just thought I wouldn't wear my trousers when I was in my room."—Indianapolis News.

Shipwrecked Men Saved From Death in Arctic

Nineteen shipwrecked men of the Canadian schooner Lady Kindersley, of the Hudson's Bay company, owe their lives to the skill of Capt. S. T. L. Whitlam, master of the United States ship Boxer, according to School Life, a periodical of the Interior department, bureau of education. The Boxer is a bureau of education supply schooner, plying between Seattle and Alaska, transporting teachers, physicians and nurses, and carrying provisions to the native schools of Alaska which are under the supervision of the bureau of education. It is a wooden boat with a carrying capacity of 500 tons.

For 27 days the Kindersley had been drifting at about 35 miles a day. Hopelessly imprisoned in the ice 40 miles off Point Barrow it is reported not a man would have been saved had the Boxer not gone to the rescue. Captain Whitlam battled with the Arctic ice for two weeks, but finally brought the Boxer within six miles of the Canadian vessel. Its crew then launched their boats and worked their way out to him.

Vampire Bats

In size, the vampire is somewhat larger than our common brown bat, compared with which it is a much heavier built animal. The spread between the tips of the outstretched wings is 8 to 10 inches, and the length of the body from the tip of the snout to the insertion of the hind limbs is 3 1/2 inches. They are commonly found living in caves or tunnels, suspended from the ceiling in clusters of immense size.

The animals usually attacked by the vampire bats are cattle, horses, mules and donkeys. Their flight is low and close to the surface of the earth and doubtless takes place late in the evening when complete darkness has set in; so that they are, owing to such habits, seldom seen.

Price of Popularity

Malcolm MacDonald, son of the former British prime minister, said at a Washington reception:

"The prince of Wales is very popular. Well, he pays for his popularity with hard work. Popularity, you know, must always be paid for."

Young Mr. MacDonald chuckled. Then he went on.

"Lafayette, at a funeral, was tremendously applauded by the people. In the end the people took his horses from the carriage and drew him home through the streets with their own hands."

"You must have been gratified," a friend said to Lafayette afterwards.

"Yes," I was, said he; "only I never saw my horses again."

"Editorial" Not a Word

On the argument that the word "editorial" is really not a word in the French language, although it is widely used, the French academy has decreed that the word shall not go into the new dictionary being compiled by it. Among other words rejected were electrification, defeat, bluff, cocktail, canter, crack, crawl and baseball. On the other hand words admitted had among them, interview, bookmaker, boy scout, bridge (for card game), camping, court (in tennis), challenge, club, cricket, gentlemen, football and athlete.

Cardinal Flower Deadly

The most familiar relative of the cardinal flower is Indian tobacco, Lobelia inflata, frequently met in open fields, and possessed of medicinal value when correctly used in the treatment of laryngitis and spasmodic asthma, says Nature Magazine.

The drug known as lobelia is obtained from this species, overdoses of which are so dangerous that a number of fatal results have been recorded. So powerful is this drug that it has figured in more than one murder trial. The handsome lobelia cardinal has been reported as poisonous.

Whitens Celery With Gas

A new process of gas treatment for celery, by which blanching or whitening may be at once hastened and cheapened, was described before the American Society of Plant Physiologists by Prof. R. B. Harvey and L. C. Regental of the University of Minnesota. Both green and self-blanching varieties were exposed to varying concentrations of ethylene and acetylene gas. Both gases can now be purchased compressed in cylinders, ethylene at \$4 and acetylene at \$1.85 per hundred cubic feet.

NEOLITHIC COUNTRY CLUB

Skinpants—How come you to score me twenty-seven strokes on the fourth hole?

His Caddy—Under the rules every wallop you take at your opponent or your caddy counts as a stroke.

Satiated Curiosity

Investigation still they press Upon our nerves unsteady; A lot of us would fain confess, "We know too much, already."

Satisfactory Golf

"Beg pardon, Mr. Flubdub," said the professional, "but the way you swing your club will never get you anywhere."

"Never mind, Sandy, I just swung a profitable business deal."

Not a Prophet

He asked the old actor when he thought he might possibly repay an ancient loan.

"Can't say, old boy. I'm an actor, not a prophet."—Good Hardware.

European Fowl Pest Found Here

Disease Is Characterized by Its Extremely Infectious Nature.

(Prepared by the United States Department of Agriculture.)
Several weeks ago Dr. Veranus A. Moore, of Cornell university, brought to the attention of the United States bureau of animal industry the existence among poultry of a disease which he diagnosed as the European fowl pest, hitherto unknown in the United States. Investigations made in New York city, and Philadelphia, by representatives of the bureau confirmed this diagnosis.

The disease is characterized by its extremely infectious nature, rapidly progressing course, and high mortality. Conspicuous symptoms are depression and loss of appetite followed by prostration. The comb and wattles usually become purple, and sometimes swollen. Sticky exudate may paste the eyelids together, clog the nasal passages and even obstruct the windpipe, causing labored breathing. A greenish yellow diarrhea may be present.

Autopsy Findings.

The nasal passage, larynx and windpipe contain some mucous exudate. Blood-stained patches and sometimes blood clots are found in the windpipe. The lungs are usually more or less pneumonic. A hemorrhagic or "blood-shot" condition is found on the crop and under the skin in various other parts, sometimes accompanied by a gelatinous exudate. Hemorrhagic spots on the muscle or fat of the heart, on the gizzard fat, on the outer surface of the small intestines, and especially on the inner lining of the gizzard are considered as diagnostic evidence of European fowl pest. Serous fluid is sometimes within the heart sac, or in other cases in the body cavity.

Since treatment of affected birds is futile, the aim should be to prevent so far as possible the spread of infection. The first fowls showing symptoms should be destroyed by a method which would guard against the contamination of the premises. The carcasses should be burned or buried deep. The healthy fowls should be moved to new quarters if possible and carefully watched for signs of disease. Houses and runs should be thoroughly cleaned at frequent intervals and disinfected with carbolic acid in 5 per cent solution. The drinking water may be made antiseptic by adding one-third teaspoonful of permanganate of potash to each gallon, a procedure which serves to prevent the spread of disease through the water, and also is a convenient means of administering an internal antiseptic.

Control Measures.

It should be remembered, said Dr. John R. Mohler, chief of the bureau of animal industry, that there are other poultry diseases prevailing that may be mistaken for fowl pest. Diseased chickens have been received for study from several points in the central West within the last few weeks, but fowl pest was not encountered in any of these shipments. Congress, appreciating the importance of prompt action in eradicating this European infection, passed a joint resolution making \$100,000 immediately available for the control and eradication of this pest. Regulation and other suppressive measures are being formulated by the bureau of animal industry to become effective as soon as the work can be organized to meet the emergency.

Embargoes were declared recently against a number of poultry producing states of the Middle West by New York city, and the states of New York, New Jersey, Maryland, Pennsylvania, Connecticut and California.

Keep Seed Corn Dry

There is no danger in corn getting too dry to grow. Moisture is the great enemy of seed corn and when it is not possible to dry it out thoroughly in the barn or crib before freezing weather, artificial heat should be used. After it is thoroughly dried there is no danger of low temperature injuring it but care should be taken not to allow it to absorb moisture again before it is used. The presence of moisture in the kernel allows the freezing and expansion which injures the seed qualities.

Feed Molasses to Hogs

It seldom pays to feed molasses to hogs when it costs more per pound than corn. In fact some experiments at the Mississippi experiment station show that it requires from 1.8 to 1.9 pounds of molasses to equal 1 pound of corn when fed to pigs. Other experiments have shown a higher value but it is certain that molasses will not equal corn pound for pound. Therefore, with corn at its present price, it would not pay to substitute molasses at 25 cents per gallon.

Farmer Who Hatches Early
The farmer who hatches eggs early does these things:

Gets more chickens, because a larger proportion of the total hatch will live.

Gets more actual meat, because more chickens will live, and because they will weigh more at maturity than late-hatched birds will weigh.

Gets more eggs, because the early hatched pullets will lay eggs during the winter and the late-hatched ones will not.

Bengaline Faille Worn at Southern Resorts

Showing smart costume of white bengaline faille, trimmed with contrasting color of the same material. May be worn with knee-length jacket of same material. It promises to be one of the spring and summer fashions.

Variety of Crowns for Dainty French Millinery

Collections of French models show a manifold variety of crown types. One thing evident about all of the crowns, however, is that they do not go in for the extreme in height, but describe the medium high types instead. Many of them incline to the sugar-loaf type, or have little creases down through the center or the sides, in ridge or helmet effect. There is a little turban of navy crepe on which Eliane uses an all-over vermicelli embroidery of gold thread and colored medallions. Another from Antoinette shows the roll front, large brim with the short back which carries the rounder crown. This is made of navy taffeta with insets of Tuscan circles in natural color set through the brim and on the crown tip, while the facing carries an embroidery of red beads used like polka dots.

A charming little toque from Madeleine is collapsible in effect and could be used for day or evening wear. It is made of large cordings of black satin crocheted in effect and in pattern. While the tiny brim is developed in points of black milan. The satin cordings are so constructed that the hair is seen through.

An eight-section tip is developed by Villettard for a red bengaline model with a flaring front cuff that is embroidered in a tuscan flower pattern and a large galalith pin trim up the crown side. Ombre rattail flowers are used all over a crown of a small shape from the same maker.

Latest Fancy Is for Fine Enamel Novelties

That any novelty in the class of accessories remains unexploited is surprising. The style market has long been stocked with the smaller articles of dress, growing ever more kaleidoscopic. The arts and crafts of the Old World have been introduced in all of the jewelry, trimmings and ornaments. We have been surfeited with the real things in jade, amber, onyx, coral, quartz and their limitless imitations. Tooled and illuminated leather, carved ivories, the most lovely examples of petit point—all have been and some still are fashionable.

The very latest fancy is for enamel, highly prized a quarter of a century ago. There are adorable examples of fine workmanship in figures, scraps of "still life" and groups, in miniature, portrayed in the daintiest colors, and all the pretty Dresden tints.

There appears to be in all the smartest shops a growing interest in petit point. It has become very popular. It is made into bags and many other lovely small things, and is used as motif in frocks. But the latest novelty is a suede-lined jacket of cut velvet woven into a perfect imitation of petit point in an old French tapestry design. With this is a soft, close hat made to match the coat.

Old Pale Gold Is Used in New Earring Designs

Earrings grow larger and longer, and a style creator foresees earrings a foot long. Some of the new-old examples that have been found in an antique shop are fashioned of the old pale gold, joined in serpentine sections and set with old-fashioned stones—fascinating old things studded with garnets, matching a medallion garnet brooch and necklace.

If one wishes to hark back to styles Victorian, there is also a bracelet of the same pattern, chased gold, with a rosette of the garnets. White sapphires, turquoises, topaz, amethysts, all of those old-time stones of lesser value are used to make the earrings more ornate.

The amusing fashion of wearing one's birthstone is again here, and many attractive rings, pins and bracelets are set with them.

Couldn't Fool Him.

The ventriloquist managed to scramble aboard the train as it was leaving the station in England. He had had no time to get a dog ticket for his terrier. When the cry: "All tickets ready!" was heard a few stations farther on, the ventriloquist dropped the dog into a hamper, which was labelled in bold characters, "Professor Jones, Ventriloquist." The conductor opened the door and the dog began to bark. Noting the label on the hamper, the conductor turned to the ventriloquist with a self-satisfied grin and said: "All right, mister! That's very clever; but you can't fool me! That trick's been played on me before!"

PROPAGANDA ON THE JOB AGAIN

News dispatches say that Germany and France are negotiating peace time treaties for commercial co-operation. And again others tell of the rage that has been aroused in Paris Frenchmen's breasts over a story attributed to German origin to the effect that France's Unknown Soldier under the Arc de Triomphe is a German.

Will the well of propaganda from which Germany drew so freely during the war never run dry?

On the other hand, it might also be said that propaganda also emanated from allied capitals in volume equal if not so insidious. In the midst of dickering for peaceful settlement of the debt question, the founding of friendly commercial relations and the efforts to forget the animosity that flamed a decade ago, such a rumor that strikes at the heart of national pride has been started.

The treaty negotiations may be wrecked by it—perhaps as its enemies intended. It is only another example of what a vast power is wielded in the world of propaganda, good or bad.

If some curb could be put on the hatred and scandal engendering campaigns of whispering and printing no doubt the world would be better for it.—Cincinnati Commercial Tribune.

Theories of the Formation of Oil.

That petroleum is of organic origin, is the opinion of the majority of geologists. The point to its persistent occurrence in sedimentary rocks, but as to whether it has been derived from animals or plants, and, if the latter, whether from marine or land forms, they are undecided. Moreover, the exact details of the process by which organic matter has been converted into oil and gas are somewhat obscure. As opposed to the organic theory is the inorganic one, which assumes that the oil and gas may be hydrocarbons, formed at great depths by the action of steam on metallic carbides—a process that can be demonstrated experimentally, but which is not borne out by field evidence. Another inorganic theory having many adherents but assented to by few geologists, is that the hydrocarbons of oil and gas are volcanic exhalations.

SCHOOLS IN WASHINGTON INDUSTRIOUS

County Agent Bragg Instructs Pupils in Various Phases of Club Work.

J. D. Bragg, county agricultural agent, visited Washington township schools in the interest of club work. Washington township has been a leader in club work for the past few years and this year promises to be bigger and better than any previous. Over fifty per cent of the pupils of club work age have made application to join. This is the highest percent in any township in the county. Priscilla Trimmer, a prize winner in last year's club, will be sewing club leader. This year's plan is much broader and the clubs of the various townships are planning a good many social functions.

Washington schools recently enrolled in the Junior Red Cross. Mr. Joe Lynch gave a first aid demonstration to the school last week.

The high school had a hundred per cent attendance last week.

Miss Mildred Barthelmas, teacher in the third and fourth grades is seriously ill at her home and Miss Winifred Huddle, normal student, whose home is at Stoutsville, substituted for her.

All the pupils who came from Stoutsville have returned to school there. Stoutsville petitioned under the emergency bill and reopened their schools.

The first case of mumps appeared last Friday.

Marvin, Kenneth and Richard Knece were transferred to South Bloomfield district last week. Raymond Stevens also was transferred to another district.

Washington received three new pupils from Circleville last week.

Winifred Given, Ernest Young, Karl Brown, Viona Smith, Bernice Drum, Elton Adams, Willison Leist, Joseph Glitt, Goldie Bolender, Priscilla Trimmer, Boyd Stout, all members of the high school civics class and Mr. Guy Drum, Ralph Leist, Virginia Given, Winifred D. Drum and Mr. Doebler spent Thursday in Columbus. At ten in the morning they were shown thru the penitentiary. In the afternoon Representative John May showed them about the State House and secured seats for the afternoon session, when the Bible Reading bill, was discussed. After the session Representative May made arrangements for them to see the governor, who gave them a splendid talk.

FREDERICK M. SACKETT

Frederick M. Sackett, Republican, was elected United States senator from Kentucky.

On Being Natural.

We all boast of our independence and our freedom to live our lives the way we think best, but at that not many of us have nerve enough, sitting at a banquet table, to dip our bread crusts into our coffee. Doing the things we like to do and being ourselves free from all affectation are two performances reserved exclusively for the few glad moments we are at home with the family.

We try to have quality in both groceries and meats.

Get your rugs in early and they will be ready when you want to use them. Call BARNHILL'S

* SOCIAL CALENDAR *

A very enjoyable evening was spent Friday night at the home of Mrs. S. W. Dunlap when she opened her spacious home for the entertainment of the Circleville Woman's Christian Temperance Union and the Y. P. B. At six o'clock an elegant dinner was served cafeteria style, after which a social hour was enjoyed by the large crowd present. At 7:30 the following program was held in charge of the president, Mrs. Gussman: Song, "Everybody Sing." The devotions were in charge of Miss Goldie Nogles reading part of the 20th chapter of Revelation and a psalm; another song, "Some Glad Day," followed, after which Mrs. Laura Hughes led in prayer. A short business session was then held after which the program of the evening was taken up. The subject dealt with the life and works of Frances E. Willard. Miss Anna Kirkwood read a leaflet on the "Frances E. Willard Memorial Fund." Reading "Frances Willard's Ambition was to Serve," given by Mrs. Hughes. Another leaflet "What Frances Willard Said," was read by Mrs. John Seimer. A very pretty little solo "How Sweet is the Love of My Saviour," followed, sung by Mrs. Fannie Greeno. A talk, "Frances E. Willard's Challenge to Young Women," was the last number on the program, given by Mrs. Bessie Long. The dinner was planned for Mrs. Dunlap, who by her long, faithful service and her loving loyalty to the W. C. T. U. has endeared herself to all the temperance women. She was also presented a beautiful potted plant.

Mrs. Harry Carruth entertained to a luncheon at her home in Chillicothe today. Among those who attended from this city were Mrs. Joseph W. Adkins, Mrs. Joseph P. Noecker, Mrs. Harry W. Heffner, Misses Helen Bennett, Virginia Shulze, Miriam Ruggles and guest, Miss Lucy Hay, of Rock Springs, Wyoming.

Howard D. Fahley and Israel Valentine were business visitors in Columbus today.

R. L. Hoeler visited his daughter Miss Verna Hoeler, at Grant hospital Columbus today.

Frank Mason went to Columbus today to attend a meeting of the State Retail Drygoods' Merchants in session at the Memorial hall.

A. J. Hall, of Los Angeles, California, is the guest of Judge and Mrs. George H. Pontius. Mr. Hall is a brother of Mrs. Pontius. From here he goes to Washington D. C.

Mrs. Mary Connor and daughter, Miss Mary, have returned home from Corsicana, Texas, where they spent the winter the guests of the former's son, D. J. Connor, and wife.

Mr. and Mrs. Robert Clark and son, Paul, of Springfield; Mrs. Tabitha Yates Hunsicker, of Columbus and Ralph Bander of Chicago, Illinois, attended the funeral of the late Mrs. George W. Bauder Monday afternoon.

Mr. and Mrs. Wallace Crist Mr. and Mrs. W. E. Crist, Miss Myrtle Hudnell Mrs. Jennie McDoel and W. E. Cawley of the Crist Department store attended the meeting of the State Retail Drygoods' Merchants in session at the Memorial hall Columbus today. This evening they attended a banquet at the Deshler.

Sulphur in the Soil.

Experiments made in this country are regarded as proving the generally prevailing theory that sulphur in the soil is of little value for promoting fertility, as compared with phosphorus and nitrogen, is erroneous and that sulphur is, in fact, of vast importance. Continuous cultivation, together with insufficient fertilization, causes a large annual loss of sulphur, which cannot be compensated from the atmosphere, and little is brought up by capillarity from the subsoil. The experimenters, therefore, recommend the application of fertilizers containing sulphur to lands which are frequently cropped. The failure hitherto to recognize the great value of sulphur in the soil is ascribed to faulty analytic methods employed by early investigators.

In Memoriam.

Editor Union-Herald:—John H. Bowsher, son of Elias and Mary Houseman Bowsher was born November 11, 1840, near Circleville, Ohio, and departed this life at his home in Pickaway township March 1, 1925, aged 84 years, three months and 20 days. He was married to Elizabeth Whiteside January 8, 1866. To this union were born three children; Missouri, Lizzie and Cary Bowsher. The mother and daughters preceded him in death. Besides his only son, Cary he leaves twelve grandchildren and two great-grandchildren. He also leaves two brothers and two sisters; W. A. Bowsher, Lagrange, Illinois; S. C. Bowsher, London, Ohio and Mrs. Emma Brobst of Circleville, Ohio; Mrs. Marietta Mickle of Williamsport.

On December 2, 1900 he was united in marriage to Clara Stevenson, who survives; also a host of friends who mourn his departure. He was a Civil war veteran of Company C, 11th Regiment, Ohio Volunteer Infantry.

War Record.

He was enrolled on the 18th day of August, 1862, and discharged from the service of the United States July 31, 1865 at Houston, Texas. This was written on the back of his discharge by his Captain Joseph Bury: "The within named soldier, J. H. Bowsher, has been with the regiment since organized and has participated in the following named battles; Chickasaw Bluff, Arkansas Post, Thompson Hill, Black Run, Champion Hill and was thru the entire Vicksburg siege. Was also in the campaign made against Mobile, Alabama, and was one among the first to mount the Rebel works at Blakeley and acquitted himself honorably and his friends may well feel proud of him as a soldier," neighbor and friend, peace be to his memory.

Perfume From Philippines.

The shrub from which the French manufacture the perfume known as cassie has been found growing abundantly in the Philippines.

Too Generous.

The trouble with the fellow who borrows trouble is that he wants to loan some of it to everyone he meets.

SALESMAN WANTED.

Large independent oil marketer, established 1896 with several nearby branches, seeks sales representative for this locality. We market motor oil, tractor oil, gear compound, roofing cements direct to farmers. The selling plan is effective with liberal discounts. Salesmen are coached in the field at company expense. We want aggressive full time workers with strong personality and some prior training in personal contact selling, because they make good from the start. Employment on salary with expense account and a monthly bonus. Age limits 28 to 45. Must own auto. Give us full details about yourself in first letter. We can then arrange interview. Address, Sales manager, 604 National building, Cleveland, Ohio. 3mchd6.

Optimistic Thought.

The principal foundations of all states are good laws and good arms.

It's the Chicks You Raise That Pay You a Profit

Chicks that die mean lost profits whether they die in the shell or after they are hatched. That's why the first step toward bigger poultry profits lies in choosing the right incubators and brooders.

The most successful poultry raisers, as well as most county agents, and agricultural colleges recommend Buckeye Incubators and Brooders as the real money makers.

Ask us for the new Buckeye Catalogue.

BARRERE & NICKERSON,
CIRCLEVILLE, OHIO.

Bible Thought for Today

MEN LOVE DARKNESS.—This is the condemnation, that light is come into the world, and men loved darkness rather than light, because their deeds were evil?—John 3:19.

Using a Doorway.
The unused doorway makes an effective bookcase. The door should be locked and treated as the back of the case. Shelves can be set in the entire door space or the lower half.

We have made arrangements with the **FLEXUME SIGN COMPANY** to send one of their electric advertising salesmen to meet all of the business men of the city of Circleville at their various places of business to explain

ELECTRIC ADVERTISING AND WINDOW LIGHTING

He will be here three days' March 3rd, 4th and 5th to demonstrate the **FLEXUME** electric advertising sign.

Any sign sold during this period the purchaser will be given ten months to pay for and at the expiration the sign is his property. It's electric advertising that illuminates High street in Columbus. State street in Chicago, Broadway in New York.

over your Stearns & Foster Mattress.

See how delightfully clean and soft it is and it never needs renovating or 'making over.' An occasional 'sunbath' keeps it as fresh and clean as a newly laundered sheet."

Over a million and a half Stearns & Foster Mattresses are giving satisfactory service in representative American homes today because of their rest-giving, health-making and enduring qualities.

The Stearns & Foster Mattress is made of nine layers of springy cotton, tufted down to just the proper tension, giving it that softness and springiness not found in any other kind.

Come in today and ask to be shown this comfortable and economical mattress.

STEVENSON'S

EMERGENCY FORD FLEET SUCCESSFUL

Big Auto Plant on River Rouge to Enter the Trans-Atlantic Shipping Circles.

The Ford Motor company will enter trans-Atlantic shipping, operating its own fleet for carrying manufactured automobile parts to the company's foreign plants, Edsel B. Ford, president announced.

At the same time, Mr. Ford announced that the company has just purchased the steamer East Indian from the Emergency Fleet corporation as the first large unit in the proposed fleet to be put into foreign service.

"We have decided to enlarge our fleet to include large ocean going vessels which will enable us to ship to our European plants and will proceed with these plans at once," Mr. Ford said.

"Our decisions in this matter has been prompted by the successful operation of our two small ships, the Steamers Oneida and Onondaga during the last few months.

"These ships have been engaged in carrying automobile and tractor parts to our assembly plants along the southern coast of the United States and to South America, taking on other commercial cargoes on return trips north. They were put into this service on a rather experimental basis and have proven the feasibility of extending our shipping service to Europe."

The East Indian, which the company has just purchased from the Emergency Fleet corporation is in the yards of the Sun Ship Building company at Chester, Pennsylvania, where it will be reconditioned. It has twin screws, driven by reciprocating steam engines, but these engines will be replaced by Diesel engines of the most modern type, Mr. Ford said. The vessel is to be entirely refitted and plans already made call for having it ready for service within six months.

The East Indian was built in 1918. It has three docks, is 485 feet in length overall, has a 58 foot beam, capacity of 12,500 tons, a 28 foot draft and speed of 12 to 13 knots an hour. It makes the fifth unit in the present Ford fleet.

The Ford Motor company first entered the shipping field last summer when it acquired the steamers Oneida and Onondaga and put them into service on the Great Lakes carrying ore and lumber from the Ford properties in northern Michigan to the River Rouge plant at Detroit. Later the big steel freighters, Henry Ford II and the Benson Ford, were added to the fleet.

The company sent its first ship to a foreign port November 5, last, when the Steamer Onondaga, carrying a cargo of automobile parts sailed from the River Rouge plant at Detroit for the Ford assembly plant at Buenos Aires, Argentine, South America. The Steamer Oneida followed a short time later with a cargo of manufactured automobile parts for plants at New Orleans, Louisiana, Jacksonville, Fla. and Houston, Texas.

The Oneida is at present in New York loading for another voyage to south coast assembly plants of the company. The Onondaga, which arrived in New York a few days ago with a cargo of linseed from South America, is to be fitted up for its first inter-coastal voyage on which it will carry a cargo thru the Panama canal to Pacific Coast ports where Ford assembly plants are located.

Ford Motor Company.
February 15, 1925.
3mchd1.

What Is Wireless?

Wireless is man's control of electromagnetic waves in the ether. But what are electro-magnetic waves? Briefly, they are disturbances traveling through ether or space, writes French Strother in the World's Work. When you see sunlight, you see electro-magnetic waves, at such a number of vibrations per second that they are perceptible to your senses through your sense of feeling or touch. But both light and heat are exactly the same thing, namely, electro-magnetic waves. The only difference between them is that the lengths of the waves are different. The wave-length of light is almost inconceivably short—about one fifty-thousandth of an inch. The wave-length of heat is longer—about one ten-thousandth of an inch. Now, wireless is exactly the same thing as light and heat, except that its wave-length is immensely longer—anywhere from 200 feet to 20 miles.

AMUSEMENTS

James Cruze's latest Paramount picture, "Merton of the Movies" which opened at the Met theater last night for a three days' run, was made famous first as a Saturday Evening Post story by Harry Leon Wilson. It was hailed as a masterpiece of satire and shortly afterward appeared as a play by George S. Kaufman and Marc Connelly. Its success on the stage was instantaneous and phenomenal. For more than a year it delighted audiences at the Cort theater in New York and was later sent on tour where it duplicated its success in some of the largest cities of the United States. It was inevitable that it should find its way to the screen. "Merton" is ideal motion picture material.

Too much praise can hardly be given to Glenn Hunter for his admirable portrayal of Merton. His work is the outstanding feature of the picture. Mr. Hunter shows us what happens to a small town youth who goes to Hollywood, determined to become a movie star. His adventures constitute a heart-grIPPING epic of pathos and drama, richly woven with typical American humor and a beautiful love story. Poor Merton! The harder he tries the louder the audience laughs! "Merton of the Movies" is one of the greatest comedy drama burlesques ever flashed on the screen.

The other members of the exceptional cast include Viola Dana, featured; De Witt Jennings, Charles Ogle Ethel Wales and Gale Henry.

Blow for the Minister.

In a certain church one of the duties of the old sexton was to pump the organ. The man was deaf and perhaps on that account had fallen into the somewhat embarrassing habit of abruptly quitting his task before a hymn was ended. One Sunday a new minister was coming, and since he was young and unmarried, the young lady who played the organ naturally wanted to appear to the best advantage. As soon as the service had begun she wrote a note and, handing it to the sexton, told him to read it at once. Evidently the old man did not correctly catch his words, for to her horror she saw him go to the minister right after the first hymn and hand him the note. The minister opened it and read: "Keep blowing steadily away until I tell you to stop."—Youth's Companion.

WILLIAM H. JOHNSTON

William H. Johnston, president of the International Association of Machinists, charges that taxpayers are losing \$1,000,000 a week because the shipping board permits private interests to control government shipping and to shunt cargoes into foreign hulls.

ODD FACTS

Haverhill, Mass., has 172 factories engaged in the manufacture of boots and shoes.

Jacksonville, Fla., ships 55,000 carloads of lumber, or 1,000,000,000 feet, each year, leading the entire South in this commodity.

The Saskatchewan Co-operative Creameries operate twenty-eight out of sixty-three creameries in the province and serve 32,000 customers.

Prepared.

A train, running on a line which had achieved an unenviable notoriety for slowness and unpunctuality, after losing considerable time in a short journey, suddenly stopped in the midst of fields. "Guard!" shouted a jovial passenger, "may I get out and pick some flowers?" "Afraid you won't find many about here," said the conductor, good-humoredly. "Oh, there'll be heaps of time," replied the jovial passenger—"I've brought a packet of seeds."

Only Real Drawbacks Are Original Cost and Consequent Upkeep.

The average man living some distance from town has found the automobile a very necessary part of his equipment. In fact, he would, once he realizes its full importance, just about as soon part with his right hand as to get along without a car. The only real drawbacks are the original cost and the upkeep. Ways are being found to reduce both. First, buy a good car and then secondly keep it in A-1 condition.

Years Not Mileage.

Statistics show the average life of the automobile to be about five or six years—years—not mileage or service. It is doubtful if the average farmer runs his car over 3,000 to 3,500 miles per year. At this rate his total mileage in six years would be 18,000 to 20,000 miles in round numbers. But no automobile ought to be worn out from this mileage. The fact is, that the car that is ready for the junk heap after 18,000 to 20,000 miles, whether used one year or six, has very likely been abused either through ignorance, carelessness or neglect. With proper care the average car should give many times this mileage.

This is an age of specialists. Why not let the boys on the farm learn to keep the cars in repair? At least one boy on every farm ought to be a mechanic—to keep the car, the truck, tractor and the rest of the farm machinery at the top notch of efficiency. It is not only the cost of the repair job—labor and parts—but the time lost that counts. A great many big repair bills can be avoided entirely by the timely care and attention that any fairly good mechanic and handy man can give, to say nothing of increased life of the machinery.

Change Oil Often.

The careful car operator will change oil often, every 500 to 1,000 miles, and never take a chance on cheap or unknown oils. It never pays to "guess there's enough oil to get to town." You may get there without apparent trouble, but later on you learn that your motor has been seriously damaged. At your leisure you can trace this back to the time or times when you "took a chance."

Watch the ammeter. It will give you timely warning of electrical troubles. If the hand wavers unsteadily or remains at zero, the cause should be located at once. Look for loose connections and if this doesn't remedy it then it is best to have some competent auto electrician make tests which will show what must be done. A timely inspection may prevent a burned-out armature which may cost the car owner \$10 to \$50, depending on the car.

Watch the battery carefully, especially in the winter to keep it fully charged. A fully charged battery won't freeze. Don't forget that you don't, as a rule, drive as much in winter and, therefore, your generator doesn't have the chance to charge the battery as thoroughly as in summer; besides your car starts or cranks much harder in the winter on account of cold motor and congealed (thick) oil. This has a tendency to discharge or run down your battery much more quickly than in summer.

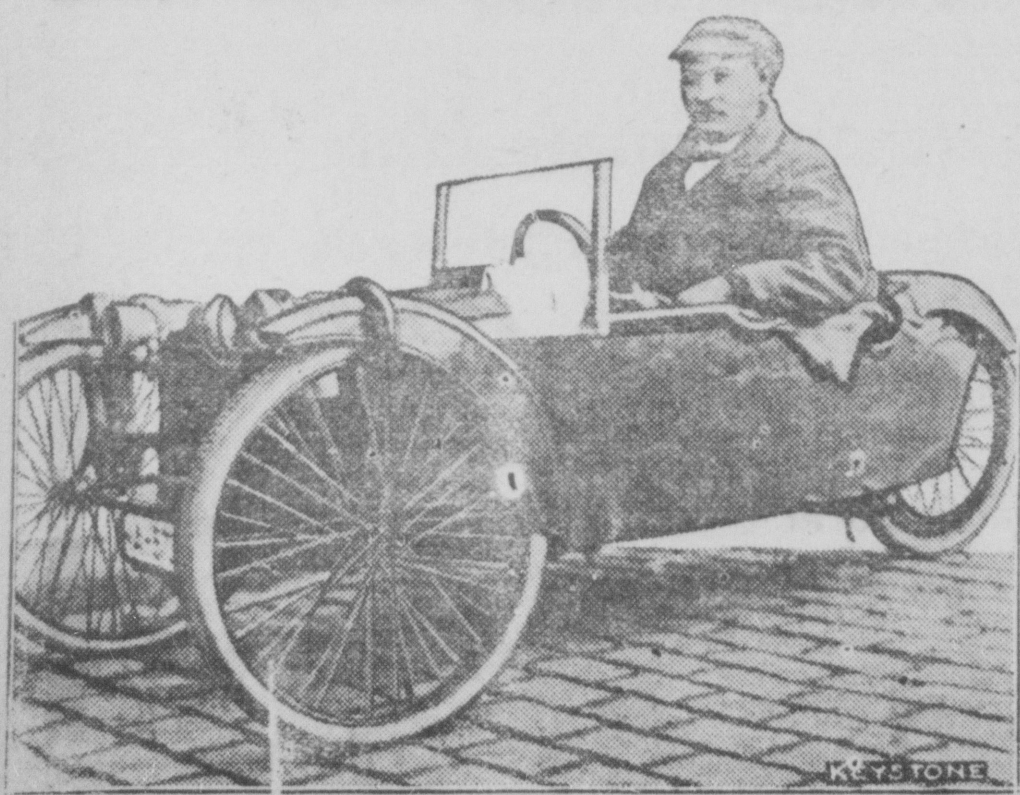

Keep Check on Horn

Always keep the horn motor, button and connections in such condition that the horn is sensitive to the briefest touch of the button. In an emergency one has little time to sound a warning, and whatever brief touch of the button is given must produce immediate results. Clean the commutator of the horn motor, oil its bearings and see that the brushes are clean.

Attaching Frame Bolts

It is sometimes rather difficult to get bolts that run through the frame channels back in place after they have been removed. Where these bolts are drilled to take a cotter pin the simplest way to replace them is to run a piece of wire through the frame hole and then out through the hole in the bolt. The bolt may then be drawn through the hole.

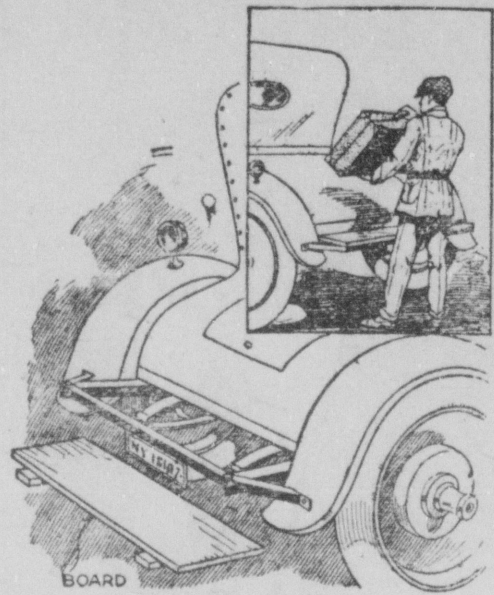

LATEST IDEA IN GERMAN AUTOMOBILES

Latest idea in automobiles is this three-wheel affair, now being used extensively in Berlin.

Luggage Carrier Quite Handy for the Roadster

Farmers who own roadster automobiles find it difficult to carry egg cases, cream cans and other articles without tying them on the running boards.

Homemade Luggage Carrier on Roadster Is Useful to Farmers and Salesmen.

This difficulty is overcome by providing a luggage carrier of the kind shown in the drawing, which is also convenient for salesmen. Two 30-inch lengths of 2-inch angle iron are securely bolted to the frame under the rear end of the car, with the ends projecting about 15 inches. Across these ends is bolted a brace of 1-inch angle iron, long enough to be bent over to permit fastening the ends to the fenders with short bolts. A piece of 1-inch board, just long enough to fit on the frame thus made, is provided with cleats, and serves as a floor on which the luggage is carried. The carrier may be enameled to match the color of the car and will support a weight of 300 pounds safely.—Popular Mechanics Magazine.

Speed Is Big Factor to Be Considered With Oil

Speed is not only a factor to be considered in oil economy, but a handy method of testing for oil dilution. If the car is not driven over 30 miles an hour, as in city driving, a gallon of oil in the crankcase may last for 1,000 miles, yet the wise owner is faced with the possibility of considerable oil dilution, since short runs in the car mean excessive use of the choker. When he suspects that there is a lot of gasoline in the oil he steers for the open road and runs fast for awhile, watching the oil level carefully. If the level does not drop rapidly the oil is in good condition, but if it becomes necessary to add a quart or two he knows that he has been driving with far too great a gasoline content.

Battery Posts Need Care

Did you ever wonder why the engine does not show the accustomed pep or why the lights burn dimly or the ignition seems poor? Unfasten the wires and bars at the battery terminals and notice if they are clean. They must be clean if current is to flow freely. Scrape off with a stick any green or white deposit you see, and spread a little cup grease over the parts to prevent corrosion.

Worn Cylinders Cause Trouble

One of the sources of engine trouble is due to worn cylinder walls. These wear most at the top, causing the cylinders to become tapered and, therefore, permitting oil and gas to leak past the piston rings. A lengthy and costly operation of reboring and the use of oversized piston rings are required where the cylinder walls are cast in block.

Kerosene Is Best

When the crankshaft turns over with a steady and unusual resistance it probably means that there is a deposit of gummy substance under the piston rings. This may be removed by putting an ounce or two of kerosene through the petcock of the engine with the spark plug wire disconnected to that cylinder for a few minutes.

Use Flexible Cable

Vibration of the car will often times break the battery ground wire. All battery connections from the starter, starter switch and battery should be made with flexible cable; stiff battery cable will sometimes shake battery cells loose from the box.

KEEPING WELL

IS COFFEE HARMFUL?

DR. FREDERICK R. GREEN
Editor of "HEALTH"

WHAT effect does coffee have on the human body?

This question has been debated hotly for many years.

Coffee, tea and tobacco have been held responsible for nearly all of the ills of human flesh in spite of the fact that they are used daily by hundreds of millions of people. Most of the discussion has been strongly prejudiced on one side or the other. What does the impartial scientific investigator say about coffee?

A three-year study of the effect of coffee on the human body has just been completed by Prof. Samuel C. Prescott of the department of biology and public health of the Massachusetts Institute of Technology, and his report is published in a scientific journal.

"The history of human experience, as well as the results of scientific experimentation," says Professor Prescott, "point to the fact that coffee is a beverage which, properly prepared and rightly used, gives comfort and inspiration, augments physical and mental activity, and may be regarded as the servant rather than the destroyer of civilization."

The essential substance in coffee, as everyone knows, is caffeine. The average cup of coffee contains from 1½ to 1¾ grains of caffeine. This substance mildly stimulates the heart, increases muscular activity and the ability to concentrate. It does not have any depressing after-effects. This is true of the average person. There are individuals who are especially sensitive to tea or coffee, just as there are persons who cannot eat certain kinds of meat, shell fish or fruits. Such persons should, of course, abstain from their use, except in small quantities.

Some persons, it was found, could take coffee clear without unpleasant effects but could not drink it with cream. Such results are in no way due to the coffee but to the differing ability of individuals to digest fat.

It is interesting to note that although Professor Prescott states that coffee must be "properly prepared," he is unable, after studying a large amount of literature from several countries, to find any directions as to the best method of making coffee. Here the professor was evidently on the wrong track. He should have questioned cooks, not books.

Facts About Tuberculosis

The National Tuberculosis association says that tuberculosis is not hereditary, and it is practically never handed on from parents to a child before birth. Infection usually comes from tuberculous parents or relatives who, by careless habits, infect the healthy child shortly after birth.

Dinner on the Fly

As an aid in feeding young fish, the experiment has been successfully tried of hanging electric lights over the water in fish hatcheries. The swarms of insects attracted by the lights fall into the hatching tubs or are snapped out of the air by the jumping fish.

Cylinders Denote Wealth

In Burma there is a peculiar way of judging a man's wealth. A rich man owns a large number of cylinders, a poor man is he who has none, no matter what actual stock or other vast possessions he may have. They also use small cannon for currency.

Powerful Tidal Current

The swiftest tidal current in the world is that between the islands of Jura and Scarba, off the Scottish coast. According to the official charts, the speed of the current here is nearly 11 miles an hour.

Japan's Former Isolation

Japan was practically isolated from the rest of the world until the American expedition under Perry, in 1853, opened it up to trade. In March, 1854, the United States made a commercial treaty with it.

FRIEDMAN'S
APPAREL FOR WOMEN

HARTMAN THEATER.

Playgoers of this section will be privileged to witness one of the most enthusiastically praised plays of the generation when "Seventh Heaven" is presented at the Hartman theater Columbus for one week beginning Monday, March 2. This is the newest dramatic success of John Golden who blended the fun and heart throbs of "Lightnin'," "Three Wise Fools," "The First Year," "Dear Me" and other plays that rank with the best loved offerings of the American stage because of their wholesomeness and gentle humanity.

"Seventh Heaven" is different from their earlier Golden plays in that its scenes are laid in Paris. The other have been typically American usually dealing with home life and quaint, everyday characters. But the same formula of clean fun and gentle pathos has been followed. The principal characters are Diane, a neglected waif of Paris slums and Chico, a swaggering street washer. Thru their suffering in the crucible of the great war the pair are lifted from squalor and ignorance to heights of great happiness in religious understanding and true love. Their elevation to the "Seventh Heaven" of bliss gives the play its title. The war serves merely as a background and is in no sense a "war play." Ann Forrest, blonde beauty of filmland plays Diane and Louis D'Arcy a young Belgian actor from Mme. Refane's repertoire company and theater Odeon, Paris, is Chico.

Matinees are announced for Wednesday and Saturday during the Columbus engagement. Mail orders will be given careful attention.

Treasure Awaits Finder

Few people know that buried somewhere close to the quaint old French city of Avignon there are now a number of priceless crosses encrusted with jewels and a great store of French, English and Austrian gold coins, all rightfully the property of the popes, and lost since the Fourteenth century. This treasure, it appears, was hidden during the reign of Pope Innocent VII, when, by order of Philip IV, the seat of the papacy was removed to France.

Expressed Nation's Faith

"In God we trust" first appeared on coins of this country in 1864. S. P. Chase, secretary of the treasury, addressed a letter to the director of the mint at Philadelphia stating that our coinage should bear a motto expressing in the fewest words that no nation can be strong except in the strength of God. This particular motto was finally decided upon. It first appeared upon a two-cent piece.

Tracing Bird Migration

A common tern banded in Maine has been reported found as far away as the mouth of the Niger river on the west coast of Africa. It is possible that the Caspian tern may likewise migrate to the eastern hemisphere, although so far no indications to this effect are to be found in the returns received from birds banded at the Lake Michigan colony.

The American Legion

(Copy for This Department Supplied by the American Legion News Service.)

LEGION PROUD OF THIS "GO-GETTER"

One incident in the military life of Peyton H. Hoge, Jr., one of the five national vice commanders of the American Legion, is significant. At one time early in 1918 he was ordered to be in four places at the same time. This might be taken as merely another instance of the involved juggling of official red tape. It was not just a happen-so, either. It was a natural consequence. It was also a prophecy. The men who issued those orders knew that if any man could be in four places at one time it was Peyton H. Hoge, Jr., and they also knew that if any man would do anything he was ordered to do if it were humanly possible, it was this same jolly Kentuckian with the drawl and the sparkling eye. That, at least, is the explanation which appears most plausible to those who have been associated with him in the

Peyton H. Hoge, Jr.

American Legion and who have known his restless energy and his go-getting enthusiasm.

Hoge was a charter member of Jefferson post No. 15 of Louisville, Ky. He was elected chairman of the post investigation committee in 1920. He decided that the best antidote for Reds was a gigantic patriotic celebration and a public rededication of the principles of America. A three-day demonstration was participated in by all citizens. More than 25,000 persons attended the rededication meeting on a Sunday night in November, 1920.

As a result of this work Mr. Hoge was appointed a member of the National American commission by Commander Franklin D'Oller, and is still a member. He compiled and distributed for Jefferson post the facts which caused German-American societies to disown the leadership and political power claimed by George Sylvester Viereck, editor of the Fatherland. He was chosen as a member of the committee to combat propaganda for extreme pacifism in colleges and churches.

The new national vice commander was born in Wilmington, N. C., January 26, 1889. At the age of ten years he moved with his parents to Louisville. He specialized in chemistry at Centre college. Since that time he has been engaged in selling life insurance. He was married to Blanche Weissinger Smith and they have two children.

Mr. Hoge was commissioned a captain of Infantry on August 15, 1917. He landed in France in the fall of 1918. He was discharged from the service at Camp Jackson on April 5, 1919.

Hospital for Care of Tuberculous Veterans

It is not generally known that the American Legion is conducting one of the best hospitals for the care of tuberculous veterans in the country today. This institution is at Camp Custer, Battle Creek, Mich., and is operated by service men and women for service men and women. It is known as the Roosevelt American Legion hospital and the wonderful success it has attained is due in the main to the co-operation of the Legion posts and auxiliary units of Michigan. The valuation of the property holdings is placed at \$1,250,000. The hospital admitted 260 patients for treatment during the fiscal year.

Eternal Punishment

A rich plumber who passed away and went where all plumbers go reported to the devil and was told to go ahead and install the new hot water system.

"All right," answered the plumber. "Give me a helper and I'll start in." "Oh, you'll have to do the work yourself," chuckled Satan. "You don't have a helper. That's the h—l of it." —American Legion Weekly.

Found Ancestors That Helped

By JANE OSBORN

(Copyright.)

WHEN the Earls—Mr. Thomas Earl, his wife Jennie and their daughter Jane—had started for their six weeks' holiday it had been arranged that they would divide their time unselfishly. For two weeks they would go where Father Earl might enjoy himself in the way he liked best, two weeks should be spent to suit the taste of Jane, and Jennie should have the disposing of the last two weeks. Two weeks had already been spent along a remote lake, a fisherman's paradise.

"And now," said Mrs. Earl, "now we'll go to Blairford. You know the Earls were among the original settlers of that town."

"You don't expect to find any traces of them now?" said Mr. Earl. "That was three centuries ago—none of my family have lived in Blairford that I ever knew."

"That's just it," retorted Mrs. Earl. "None of your immediate family ever took any interest in their antecedents. But for Jane's sake I think we ought to get the pedigree."

"That's dear of you, mother," beamed Jane. "Only if you'd just as soon I think I'll let you and daddy go along to Blairford and I'll stay right here. George Brown is coming up next week, and—"

Mrs. Earl shook her head reprovingly. "George Brown—a mere nobody," she scolded. "He may be a nice boy, but his father was just a post office clerk and he isn't doing much better. Besides, I want you to be there—we may meet some really fine people. Descendants of the first settlers are all the time going back."

So the Earls went to Blairford. It had grown but little since the time nearly three hundred years before when an ancestor of Thomas Earl with a party of forty other men and their wives and children, had first called it home. Mrs. Earl spent a day after their arrival "taking the lay of the land." She didn't want to rush into this matter of finding distinguished ancestors hastily. She discovered that there was a "historical museum" at one end of the town where a motley collection of old belongings of the early inhabitants had been carefully preserved.

In the green or common there was a tablet to the Revolutionary soldiers from the town, and Mrs. Earl looked diligently there for a trace of the name Earl, but in vain. "Here are the Razins, and the Hulsteds and the Browns," she said. "You might think they owned this town. Their names appear on every list. I rather wish I knew some of their descendants."

A few days later they went to the museum, and after having signed their names in an enormous registration book they hovered about three close rooms of the old house, looking at the historical collection.

"Look here, Jennie," called Mr. Earl from the little attic whither he had gone. "Here's something that belonged to one of the Earls." Jennie fairly flew to the attic.

"See, it is a sausage filler," Thomas Earl explained, "used by John Earl in his shop on the green." Mr. Earl grinned. "And over there is a bit of rope taken from the old slaughter house belonging to Hiram Earl. I guess they were—"

"Tom, you don't imagine they were the butchers, do you?" accused Jennie. "Like as not," beamed Thomas. "That's an honest calling and a mighty important one."

Jennie descended the rickety stairs and began talking to the oldish woman who acted as curator of the tiny museum. She told the lady that her husband was descended from one of the first settlers. "I'll show you the old charter of the town," said the curator, leading the way to a faded parchment under a glass case. "Here are the signatures of the settlers who could write," she said. "These over here merely made a mark and the clerk of the company wrote in their names." Jennie looked quickly through the list. The first settler, Thomas Earl, had made his mark and after his mark was written "Thomas Earl, Barnabus Brown's bondman."

Jennie made no comments. She was about to look for her husband, still in the attic, when it occurred to her that her daughter was not to be seen. The curator explained that while she had been upstairs a young man had come in and they had gone out together to talk.

"It was young Mr. George Brown," explained the curator. "He's a descendant of Barnabus Brown, in the line of General Brown of the Revolution and Judge Brown. The old Brown mansion is up on the green—Barnabus Brown, you know, was a younger son of Lord Gerald Murray."

A few minutes later Mrs. Earl found her daughter and George Brown seated in George Brown's inexpensive run-about in front of the museum.

"You see, when I found out that Jane had come here I followed," said George. "This is an old hunting ground for me. My folks are more or less connected with the town. Besides, I just had to see Jane—"

Jane looked appealingly to her mother. "I may as well tell you, mother," she said, "that George and I are engaged."

"Why, Jane, why George," said Jennie smiling, "I know you'll be happy. I had no idea you were descended from Barnabus Brown. But let me run and tell Tom."

PUBLIC SALE!

Having disposed of my farm, I will sell at public auction the entire farm equipment on the Ella R. Renick farm 8 miles west of Circleville, on the Darbyville and Circleville pike, on

FRIDAY, MARCH 6, 1925 commencing at 11 o'clock a. m., consisting of the following articles:

12 HEAD HORSES—5 COLTS

1 gray mare 6 years old weight 1400 pounds; 1 black gelding 7 years old weight 1400 pounds; 1 bay gelding 7 years old weight 1300 pounds, 1 gray mare 6 years old, weight 1300 pounds, 1 gray mare 12 years old weight 1500 pounds; 1 gray mare 13 years old weight 1400 pounds; 1 bay mare 10 years old weight 1200 pounds; 1 gray mare 11 years old weight 1000 pounds 1 gray mare 8 years old weight 1100 pounds; 1 Percheron stallion, 9 years old weight 1600 pounds; 1 road colt, 6 years old, black saddle horse 8 years old, 5 colts coming yearlings. All these horses are extra good work horses and all mares with foal.

2 HEAD OF COWS 2 extra good Guernsey cows will be fresh in June.

22 HEAD OF HOGS 3 brood sows, 1 with pigs by side, others will have pigs soon; 1 Duroc Jersey boar eligible to register; 18 shoats weight between 60 and 70 lbs.

FARM IMPLEMENTS

1 Avery tractor, cultivator and corn planter attached, in extra good working shape; 2 14 in. Oliver sulky plows, 1 12 inch walking plow, 1 14 in. 3 bottom Oliver tractor plow, 2 two-row cultivators, 1 tractor double disc, 1 10 ft. cultipacker, 1 Black Hawk corn planter and soy bean planter attachment, 1 steel roller, 1 8 ft. cut McCormick binder, 1 16 in. Paypeck ensilage cutter, 1 Steel King wagon with flaring bed, 1 Melbourne wagon without bed, 1 house car, 2 sets of hay ladders, 1 hay loader, 1 cement mixer, 2 gasoline engines, 50 rods of 4 inch drain tile, 5 sets of work harness, 1 spring tooth harrow, 1 6 roll International corn shredder, 2 DeLaval cream separators 1 50 barrel water tank, 1 25 barrel water tank, 1 15 barrel water tank, 1 10 barrel water tank, 1 set of dehorn clippers, blacksmith outfit consisting of vice, drill and other tools, 1 150 gallon gasoline tank and a few gasoline drums, 2 bushels of alfalfa seed, 1 grindstone, 1 meat block, 1 sausage grinder, 1 4-burner coal oil stove, post hole diggers, pitchforks—shovels, double and single trees, 30 tons of timothy hay, if not sold before day of sale and many other things too numerous to mention.

TERMS—\$5 and under cash; over \$5 a credit of nine months will be given purchaser giving bankable note at 6 per cent.

EX-SENATOR W. A. CLARK PASSES AWAY

Miner, Railway Builder and
Capitalists Succumbs
After Week's Illness.

New York, March 3 (UP).—William Andrews Clark, former U. S. senator from Montana and multi-millionaire copper magnate died at his Fifth avenue mansion here last night following a brief attack of pneumonia. He was in his 86th year.

Clark whose fortune has been estimated by some at from \$50,000,000 to \$100,000,000, was in active command of his many interests until about a week ago. Since last Christmas he had conducted his business from his home.

Pneumonia developed Thursday. Monday afternoon his condition took a turn for the worse and at 7:20 o'clock he died.

The aged copper king was born in Connellsville, Pennsylvania, in 1839. He went west in the Colorado gold rush and during the succeeding years was a teamster, miner, merchant, railway builder, mine owner and U. S. senator.

Clark's enormous fortune is said to have been made thru his purchase of the United Verde mine for which he is reported to have paid \$150,000. As his fortune grew he became a collector of art and his possessions all housed in his New York home are worth several million dollars.

His stay in politics lasted several years culminating in a bitter fight with Marcus Daly, a rival copper king. Clark was eventually elected and served from 1901 to 1907. Clark was twice married, first in 1869 to Miss Kate L. Stauffer of Connellsville. She died in 1893. Several years later he married Miss Anna LaChapelle, who had been his ward.

NOTICE.

The monthly meeting of the Circleville Benevolent association will be held at the City cottage Tuesday, March 3, at 3:30 o'clock.

How She Had Fooled Herself

By H. LOUIS RAYBOLD

(Copyright.)

"HONESTLY, Eleanor," said Cabra King seriously, "if you could choose exactly what you would be in life, just what would you pick?"

Eleanor Colby, brown-eyed and thoughtful, pondered this for a moment without replying. Then she said emphatically: "Well, there is no question in my mind. I know absolutely. I'd be Dean of the college here. I love the dear old place, I adore girls and I would love having their welfare in charge. How about you, Sabra?"

Sabra laughed. "Oh, I'm a silly creature. I'd like to marry and have six children!" The other girls joined in the merriment which followed, yet each secretly felt that Sabra's ambitions were more likely to be realized than anybody else's; for wasn't she easily the most popular girl in the class with a string of adorers anyone of whom was ready to marry her the moment she graduated? Yes, indeed, as the class prophecy had it, "Sabra King at once will wed and settle down to making bread."

However, June arrived with its Commencement day and diplomas and passed without any wedding invitations from Sabra. Somehow or other she had been unable to decide between Alec Howe and Will Derick and had refused both of them.

Kenton Blakesly took her about for a while, then fell violently in love with a newcomer to town and married her before she went home. Sabra's father, suspecting a damaged or at least an affronted heart, gave his daughter money for a trip abroad and Sabra departed to spend pleasantly melancholy hours among Greek ruins. Upon her return she signed up for postgraduate work at the college as a sort of time filler and it was in the archeology class that she came in contact with Professor De Witt.

Now Sabra was not a girl who would be particularly attracted to a man because of his brains. She demanded a certain attractive masculinity in anyone who was to share her interest and De Witt rather measured up to her requirements.

He fell for Sabra promptly as men usually did, but unlike most of them he did not follow a few weeks courtship by an offer of marriage. He seemed interested in developing in her an interest in things archeological.

Sabra at first allowed herself to be lured into profounder study of the subject through a casual interest aroused by her trip abroad. Then, gradually, she found herself becoming absorbed. She even enrolled in courses dealing with correlated subjects and took up definitely advanced research work. Furthermore, she took a room at the dormitory as a more convenient mode of living when so much of her time was spent at the university.

And so, little by little, more than any other graduate she became a part of the college.

It is not surprising then that one evening a year or two later she was waited upon by members of the board of trustees who found their dean lured to another college and her position vacant.

"We want you, Sabra King," they told her, "for our dean. More than any other woman you have allied yourself with the college and its interests and when we find among our own members a woman capable of filling the place, we do not believe in hunting up an outsider."

Stunned at the unexpectedness of the offer, Sabra demurred. She begged for, and was granted, time to consider. Although she hardly admitted it even to herself, she was unwilling to decide without consulting Perry de Witt.

That night she laid the matter before him and tensely and curiously awaited his reception of it.

"Take it," he said earnestly. "It is really a remarkable offer for—pardon me—so young a woman! I only regret that I shall not be here to witness the excellencies of your administration. I myself have just been appointed to a full professorship in Lehigh and the increased salary means that at last I can ask to marry me a woman I have long loved and of whom you somewhat remind me."

In the privacy of her room Sabra laughed until she very nearly cried. How she had fooled herself! Yet she was surprised to find that there was no resentment or disappointment. On the contrary a sense of relief enveloped her that she had no choice to consider. Choosing had always been difficult for Sabra. As it was, she wanted the fiancé more than marriage.

Ten years afterward, Sabra, still the popular dean of Ashley, attended a reunion supper of her class, now fifteen years out of college.

"Do you remember?" asked somebody, "how we discussed our futures one day and Eleanor Colby wanted to be dean of Ashley? And now it is Sabra King! By the way, whatever became of Eleanor after she graduated?"

"Oh," spoke up somebody else, "she went home. She was a Western girl, you know. I believe she taught a while. But now she's married. Why, she married that professor who was here—De Witt or something."

"De Witt?" asked Sabra. "Perry De Witt?"

"That was it. Well, she married him. And they have six children. Eleanor—of all people. Imagine!"

Queer.

Said the facetious feller: "A couple of dull kids will make any woman look smart—if they're on her feet."

Wallpapers Painted by Hand.

The revived interest of American house decorators in the old-time wall-papers has resulted in a finding of some excellent specimens, put away 100 years or more ago in some attic. Eighteen rolls of paper were recently discovered in an old New England house that tell the story of Pizarro's visit to Peru and illustrate also the habit of the old-time wallpaper makers in going far and wide in history and geography for their subjects, says the Christian Science Monitor. These old wall-papers were often painted by hand or made by the old art of hand-block printing, although nowadays they are reproduced, literally or otherwise, by printing from wooden blocks. The Pizarro paper was probably brought to America as long ago as 1755.
